Eighteenth-century Epicureanism is often viewed as radical, anti-religious and politically dangerous. But to what extent does this simplify the ancient philosophy and underestimate its significance in Enlightenment writing?

Through a pan-European analysis of Enlightenment centres from Scotland to Russia via the Netherlands, France and Germany, contributors argue that elements of classical Epicureanism were appropriated by radical and conservative writers alike. They move beyond literature and political theory to examine the application of Epicurean ideas in domains as diverse as physics, natural law, and the philosophy of language, drawing on the work of both major figures (Diderot, Hélvetius, Smith and Hume) and of lesser-known but equally influential thinkers (Johann Jacob Schmauss and Dmitrii Anichkov). This unique collaboration, bringing together historians, philosophers, political scientists and literary scholars, provides rich and varied insights into the different strategic uses of Epicureanism in the eighteenth century.

Thomas Ahnert, University of Edinburgh; Elodie Argaud, Université Jean Monnet, Saint Etienne; Hans Blom, Erasmus University, Rotterdam, and Collegium Civitas, Warsaw; Pierre Force, Columbia University; James Harris, University of St Andrews; Andrew Kahn, St Edmund Hall, Oxford; Neven Leddy, Independent scholar; Avi Lifschitz, University College London; Natania Meeker, University of Southern California, Los Angeles; Matthew Niblett, Keble College, Oxford; Charles Wolfe, University of Sydney.

French Review
This excellent collection of essays revisits Epicureanism in its various associations with Enlightenment throughout Europe and as far as Russia.

[...] part of the pleasure of the volume comes from the way it continually moves between examining local contexts and asking large questions.
